

Corporate Improvement Plan 2014-17

Maidstone Borough Council has been recognised under previous inspection regimes as providing good quality value for money services. However, we want to be even better, offering the services that people want for a cost they think is good value. In 2010 the Government announced its plans to reduce public spending by 25% and reduce the national deficit. The Council has to save around £4,059 over the next three years, which is a substantial reduction in the budget we have to spend on providing services for local people, at the same time that the number of potentially vulnerable people requiring some of those services, such as housing advice and Housing and Council Tax Benefit, has increased.

The Strategic Plan details the priorities and priority outcomes for Maidstone until 2015 and how these will be delivered. The Medium Term Financial Strategy (MTFS) sets out what the Council will spend and when and where savings will be made. In order to deliver the Strategic Plan and MTFS the Council is undertaking various pieces of work and projects to improve value for money and quality of customer service, and this must be aligned with the Council's strategic objectives and Medium Term Financial Plan. This improvement work makes up the building blocks that will make Maidstone a better council.

This plan explains the key workstreams for the Council's improvement journey, the drivers for improvement as well as priority services and projects for improvement. It will allow work to be planned, sufficiently supported and monitored to ensure savings needs and the improvements required for the Council to meet its priority outcomes are delivered.

Objectives

It is important that the Council delivers services that are value for money and that residents are satisfied with. We must make savings and maximise income where we can, but also be flexible enough to take opportunities as they arise, including those that come from external influences like changes in legislation. Therefore, the objectives of the Corporate Improvement Plan are:

1. A reduction in net cost, through making savings or increased income
2. Improving or maintaining quality: ensuring we deliver excellent services, which means delivering what is promised to agreed standards
3. Identifying and responding to opportunities aligned with the Strategic Plan

Improvement workstreams

The Council's Improvement Plan is corporate and involves a number of different workstreams, which are owned by different officers in the organisation. Those workstreams identified as most important are:

- 1. Efficiency and effectiveness (Head of Finance and Resources)** – looking at our services to make sure we are doing the right things to deliver our organisational priorities and working with our customers to make sure that the way we do them is as customer friendly and efficient as possible.
- 2. Income generation (Head of Commercial and Economic Development)** – maximising the value from the income streams we already have in place, exploring other options for income generation and launching any viable initiatives that will bring in sustainable income to the Council.
- 3. Asset management (Head of Finance and Resources)** – making the best use of the buildings and land we already own or lease, exploring opportunities to add to our property portfolio to support delivery of organisational priorities and bring in income, as well as transferring assets to the community or selling assets that are no longer viable for us to keep.
- 4. Empowerment and self-sufficiency (Head of Housing and Communities)** – empowering borough residents to do more for themselves through building financial and digital access and skills. Supporting communities to deliver services where they could do this better or take on assets of community value that we can no longer properly support.

These workstreams and the whole Improvement Plan are underpinned by the following enablers:

- **Organisational culture** (Head of HR) – ensuring that staff and members can contribute to and understand their role in delivering organisational priorities. Embedding an organisational culture where staff are empowered to do their jobs through appropriate training and managerial support, where there is permission to experiment and time to learn. This includes looking at best practice in other organisations and ensuring that all officers and members are engaged and are able to give their feedback and ideas. Improving collaboration between different parts of the organisation, ensuring that change is well managed and that there is the capacity and capability to deliver the required outcomes. This will all contribute to our aim of achieving Investors in People (IiP) Gold by 2015.

- **Councillor assurance** – leadership and involvement of elected members in shaping, implementing and monitoring the progress and outcomes of policies and projects.
- **Commissioning and procurement (Head of Finance and Resources)** – looking at all the options for delivering a service and picking the right one. Where we have to purchase goods or services, using the correct process to ensure legal compliance and value for money.
- **Effective use of technology (Head of ICT)** – utilising technology to better engage with customers, deliver better and more efficient services and save money.

Priority services and projects for improvement

In order to ensure we can deliver our priority outcomes in the Strategic Plan and savings in the MTFS it is important to make changes in the following service areas. The list of service areas below is in order of priority for improvement, from highest priority to lowest. These improvements may be to deliver savings, improve the quality of a service or respond to an opportunity that may arise.

1. **Waste & Recycling** – working to achieve the target of 50% recycling by 2015 and making a surplus from our commercial waste service
2. **Economic Development** – ensuring we have clear deliverable priorities for achieving growth through economic development and regeneration by working with partners to develop a Regeneration and Economic Development Plan and collaboratively ensure there are the resources and skills required to deliver this
3. **Housing** – Reducing the number of people and days spent in temporary accommodation and improving the amount and the diversity of housing supply, including in the private rented sector
4. **Maidstone Culture and Leisure** – using our cultural and leisure assets like the Museum and Mote Park better to bring in a sustainable income
5. **Customer Services** – redefining and achieving our customer service standards and moving to our 'digital first' customer service model by moving more contacts to our website and away from face to face visits and the telephone
6. **Revenues and Benefits** – preparing and planning for the effects of national welfare reforms, analysing the impact of the localised Council Tax and business rate schemes, maximising the collection of business rates and exploring different ways of delivering the service for the future e.g. joint Fraud initiative

- 7. Planning** –exploring opportunities to make the Development Management Service more efficient and improve the value for money of specialist advice
- 8. Environmental Services** – making the Street Cleansing and Grounds Maintenance services more efficient, including improving work practices and feedback to customers through use of technology
- 9. Bereavement Services** – exploring options for delivery, introducing more efficient working practices and expanding the offer at the Crematorium
- 10. Finance** – building an efficient service that enables the Council to make informed strategic financial management decisions, manage and control budgets and commit and measure resources and investigating how this service could be delivered in the future
- 11. Building Control** – re-designing the service, diversifying work to undertake more trading rather than statutory work and investigating options for delivery of the service, in particular the viability of a public sector partnership, and developing a model for delivery for the future
- 12. Corporate Support** – investigating whether our Print services could be a viable commercial service and/or whether our Corporate Support services could be shared with local authority partners

As well as work in particular service areas there are a number of other important projects that need to be undertaken in each of the improvement workstreams:

- **Integrated Transport Strategy** – adopting our Integrated Transport Strategy and delivering this to ensure the infrastructure is in place to support the development proposed by the Core Strategy and to address some existing traffic congestion issues
- **Major assets review** - reviewing the Council's major assets as part of the Asset Management Plan to make savings and/or maximise income potential. This includes considering long term options for Council accommodation in the town centre, looking at the future use of the Town Hall, exploring options for the King Street, Medway Street and Brunswick Street car park sites, as well as improving and maximising income from the Park Wood industrial estate.
- **Right to bid and community asset transfer** – investigating which assets and services might be appropriate to be delivered by the community through the 'Right to Bid' and establishing an effective mechanism and approach for supporting the transfer of community assets

where this is appropriate, demonstrating value for money and maximising their use

- **Mid Kent Improvement Partnership (MKIP) shared services and operational model** – working with partners, in particular our MKIP local authority partners, to establish closer working arrangements and partnerships in more services, as well looking at all the services we share and deciding on and delivering the best operational model for the future
- **Information and knowledge management** – implementing the recommendations of our external Information Management review to ensure we make more efficient, secure and smart use of information we gather and store. This includes improving our information governance arrangements, agreeing relevant policies, improving our systems architecture and finding ways to turn information into knowledge
- **Commercial property investment** – increasing our property portfolio by identifying and purchasing secondary property market options and converting the Chillington Street building for residential use
- **Digital inclusion** – working with partners to identify the geographical areas and communities that are most likely to be digitally excluded and work with them to identify solutions. This could mean increasing or signposting publically accessible computers, running training courses or accessing cheap computer schemes
- **Financial inclusion** – Working with partners to improve financial awareness and identify solutions to reduce the impact of financial exclusion. Financial inclusion is the ability of an individual, household or group to access appropriate financial services or products. There are a number of barriers to financial inclusion including debt problems, fuel poverty, poor financial knowledge, no affordable credit and low income. Those most likely to be financially excluded include people over 60, young adults, single parents, people with disabilities and people on low and insecure incomes.
- **Local flood plans** – completing our investigations of how we and other local and national agencies responded to the floods in December 2013 and, over the longer term, working with Kent County Council, the Environment Agency and the Flood and Coastal Regional Committee to consider whether any flood defence schemes are viable and whether these could be pursued. Also, working with local communities at risk of being affected by flooding in the future to help them formulate local flood plans. This will help ensure that communities directly affected by flooding will be able to work together in a planned way to minimise the impact of any floods on people and their property

This is how the priority services and projects for improvement fit in with the 4 improvement workstreams:

Efficiency and effectiveness	Income generation	Asset management	Empowerment and self-sufficiency
Planning Economic Development Revenues and Benefits Housing Finance Building Control Environmental Services Customer Services MKIP shared services and operational model Information and knowledge management	Maidstone Culture and Leisure Waste and Recycling Corporate Support Bereavement Services	Integrated Transport Strategy Major assets review Commercial property investment	Right to bid and community asset transfer Digital Inclusion Financial inclusion Local flood plans

More detail on the work to be undertaken on the priority service areas is shown in Appendix 1.

Governance and Monitoring

The Cabinet own the Council's improvement journey and the Chief Executive is ultimately accountable for delivery of the Corporate Improvement Plan. Political leadership is provided by the Leader and the Cabinet. A head of service is responsible for each of the workstreams and enablers that make up the improvement journey detailed above. The Leader, Chief Executive, Director of Environment and Shared Services and the appropriate heads of service make up a group that will monitor progress against plan to ensure that any, as yet unknown opportunities that would provide greater benefit than the work already

planned, are not missed and that the services and projects for improvement are re-prioritised as necessary as a result.

This plan will be updated annually to the same corporate planning timetable as the Strategic Plan and MTFS. A progress report will be compiled and sent to Cabinet 6 months after the adoption of the Improvement Plan.

Future plans for priority service areas

<u>Service area</u>	<u>Longer term</u>	<u>2015-17</u>	<u>2014/15</u>
Waste & Recycling	<ul style="list-style-type: none"> • Achieve recycling rate of 60% • Reduce total household waste arisings across the Borough • Work with Kent County Council to secure maximum value for recycle • Expand the Commercial Waste service across Borough and across Kent 	<ul style="list-style-type: none"> • Focus on waste reduction and reuse initiatives to achieve recycling rate of 60% 	<ul style="list-style-type: none"> • Achieve 350 commercial waste customers • Introduce food waste recycling into flats and Houses in Multiple Occupation • Achieve a recycling rate of 50% through focused engagement in poor performing areas • Adopt a new five year waste strategy • Review team structure
Customer Services	<ul style="list-style-type: none"> • Reduced cost of provision 	<ul style="list-style-type: none"> • Digital first customer service model embedded • Reflect effect of welfare reforms • Make best use of the Gateway building • Investigate possible models of customer service delivery across MKIP partners • Review the resources from the Contact Centre and Gateway to ensure that the website is effectively and permanently resourced • Investigate possible income streams through offering 	<ul style="list-style-type: none"> • Agree customer charter, customer care policy and customer service standards • Select other voice activated call assistants if effective • Work with Gateway partners, including Kent County Council, to understand all of our face to face needs for the future • Increase the number of online self-serve forms available and the percentage of processes that are carried out using online forms • Review the resources required to deal with emails and identify an appropriate support system and/or processes • Consider options for service delivery to suit the Council's digital first model of customer service delivery and deal with resilience and

		<p>greater range of partner customer service provision</p> <ul style="list-style-type: none"> • Move to a face to face appointment system 	<p>turn over issues better</p> <ul style="list-style-type: none"> • Explore the use of web chat • Consider whether there is a continuing need for a Customer Relationship Management ICT system
Planning	<ul style="list-style-type: none"> • Embed chosen delivery method for minors and enforcement • Explore introducing Planning Performance Agreements to expedite major planning applications 	<ul style="list-style-type: none"> • Explore options for delivery of minors and enforcement e.g. through Right to Bid, sharing with partners etc. 	<ul style="list-style-type: none"> • Embed new ICT system • Embed new ways of working following staff restructure and introduction of the new Planning Support shared service • Explore sharing or jointly procuring specialist advice with our MKIP partners • Work with Business Improvement to make the Development Management service more efficient • Maximise the use of pre-application advice
